

Core Managed's DFARS/CMMC/NIST 800-171 Readiness Solution

Securing sensitive information is essential in today's digital landscape, especially for organizations handling Controlled Unclassified Information (CUI). Our DFARS/CMMC/NIST 800-171 Readiness solution is designed to navigate the complexities of cybersecurity compliance, providing you with confidence and ease in achieving and maintaining compliance.

Tailored Roadmap for Seamless Compliance

Your compliance journey begins with a customized roadmap aligned with your business goals. Our solution begins with a thorough assessment of your cybersecurity posture, identifying gaps and prioritizing actions to ensure purposeful and effective compliance efforts. With Core Managed, you'll have a clear path towards compliance.

Expert Guidance and Support

At Core Managed, you benefit from the expertise of seasoned cybersecurity professionals committed to your success. Our experts stay updated on regulatory changes and best practices, offering guidance that is both current and practical. From policy development to system hardening, we provide end-to-end support to help you meet and exceed compliance standards.

Robust Security Controls Implementation

Implementing robust security controls is fundamental for DFARS, CMMC, and NIST SP 800-171 compliance. Our solution entails the deployment of appropriate technologies and processes to protect CUI and enhance your overall security posture. We focus on building a resilient infrastructure that not only meets regulations but also defends against evolving cyber threats.

Continuous Monitoring and Improvement

Compliance is not a one-time achievement—it's an ongoing effort. Our solution includes continuous monitoring of your systems and processes to ensure they align with compliance requirements. We help foster a culture of continuous improvement, where cybersecurity becomes a strategic advantage rather than just a checkbox.

Incident Response and Recovery Planning

In the event of a security incident, swift response is crucial. Our solution incorporates incident response and recovery planning to minimize the impact of potential breaches. We assist in developing and testing incident response plans, ensuring business continuity and rapid recovery of operations in the face of cyber threats.

Training and Awareness Programs: Strengthening Your Human Firewall

Human error is often the weakest link in cybersecurity. Our solution includes comprehensive training and awareness programs for your staff, equipping them with the knowledge and skills to recognize and prevent cyber threats. By fostering a security-conscious culture, we strengthen your organization's human firewall.

Documentation and Reporting Made Simple

Proper documentation and reporting are vital for compliance. Our solution ensures all necessary documentation is accurate, up-to-date, and readily available for audits and assessments. We help you maintain a clear record of compliance efforts, simplifying the demonstration of your commitment to cybersecurity.

Partnership for Success

Partnering with Core Managed means collaborating with a trusted advisor invested in your success. We closely work with you to understand your unique challenges and tailor our services accordingly. Our aim is to build a long-term partnership that supports your organization's growth and success in a secure and compliant manner.

Why Choose Core Managed?

Our DFARS/CMMC/NIST 800-171 Readiness solution is your comprehensive package for cybersecurity compliance. With our expert guidance, robust security controls, continuous monitoring, and dedicated support, you can achieve and maintain compliance with confidence. Let us transform the complexity of compliance into a strategic asset for your organization, ensuring the protection of sensitive information and defending your operation against cyber threats.
