

vCISO Services

Core Managed's vCISO Services

In today's ever-evolving digital landscape, cybersecurity is paramount for organizations of all sizes. However, not every business has the resources to hire a full-time Chief Information Security Officer (CISO). That's where Core Managed steps in with our comprehensive vCISO Services.

Expert Guidance, Tailored to Your Needs:

Our virtual CISOs bring years of experience and expertise to the table, providing strategic oversight customized to your organization's unique requirements and budget constraints.

Integral Part of Your Team:

We aren't just consultants; we become an integral part of your leadership team, collaborating closely to develop and maintain a robust cybersecurity program aligned with your business objectives.

Customized Approach:

We understand that every organization is different. That's why our vCISO Services will begin with a thorough assessment of your current cybersecurity state, ensuring that our approach is tailored to your specific operational environment, regulatory requirements, and risk tolerance.

Comprehensive Cybersecurity Roadmap:

Following the assessment phase, we work hand-in-hand with your team to develop a strategic cybersecurity roadmap. This living document outlines actionable steps to enhance your security measures, leveraging best practices and cutting-edge technologies.

Key Components of Core Managed's vCISO Services:

Governance Framework Establishment:

We assist in defining clear cybersecurity policies and procedures, fostering a culture of security awareness within your organization.

Risk Management:

We will identify, assess, and prioritize risks, helping you make informed decisions about resource allocation to mitigate potential threats effectively.

Compliance Guidance:

Whether it's GDPR, HIPAA, or PCI-DSS, our vCISOs navigate the complexities of regulatory compliance, ensuring that your cybersecurity program meets industry standards.

Incident Response Readiness:

We develop and test incident response plans, ensuring swift and effective responses to security breaches, along with guidance on communication strategies.

Vendor Management:

We will assess the security postures of your vendors, facilitating due diligence processes and monitoring vendor compliance to secure your supply chain.

Continued Partnership for a Secure Future

At Core Managed, we view cybersecurity as an ongoing journey, not a one-time project. Your personalized vCISO Services are designed to be a long-term partnership, providing continuous support and guidance as your organization evolves.

Why Choose Core Managed's vCISO Services

We identify, assess, and prioritize risks, helping you make informed decisions about resource allocation to mitigate potential threats effectively.
