

SaaS Security Services

Core Managed's SaaS Security Services

With cyber threats on the rise, securing Software as a Service (SaaS) applications is not just important—it's essential. Core Managed offers cutting-edge SaaS Security Services that provide comprehensive protection for your organization's SaaS ecosystem. With such large amounts of sensitive data being accessed remotely, there are few security services more crucial.

Proactive Security Monitoring

Our SaaS Security Services are built on proactive measures, continuously monitoring user activity and configurations across all your SaaS applications. This real-time surveillance ensures swift detection of any anomalous behavior or unauthorized access, keeping your organization ahead of potential threats.

Tailored Alerting System

Cut through the noise with our sophisticated alerting system, delivering only the most relevant information. Customize thresholds and parameters to match your organization's risk profile, ensuring timely notification of incidents without unnecessary distractions.

Compliance Simplified

Stay compliant with ease using our comprehensive reporting capabilities. Whether it's GDPR, HIPAA, SOC 2, or other regulatory frameworks, our platform provides the tools to maintain compliance and furnish auditors with the necessary documentation.

Seamless Integration

Enjoy seamless integration with popular SaaS applications like Microsoft 365, Google Workspace, Salesforce, and Slack. Our platform brings them all together, providing a unified view of your security posture tailored to each application's unique considerations.

Intuitive User Experience

Our intuitive interface ensures ease of use for users of all technical levels. Prioritize security within your organization, making it a shared responsibility across teams.

Automation for Efficiency

Automate routine tasks and incident response, reducing the workload on your IT team and freeing up resources for strategic initiatives.

Detailed Forensics

In the event of a security incident, leverage detailed forensic capabilities to conduct thorough investigations and trace the origins of breaches.

Dedicated Customer Support

Count on our dedicated team of security professionals for setup assistance, troubleshooting, and ongoing support.

Continuous Innovation

Stay ahead of evolving threats with our commitment to continuous updates and incorporation of the latest best practices in SaaS security. Cyber risks are constantly evolving and new threats appear everyday, you can't afford to choose a SaaS Security Service that doesn't keep up.

Why Choose Core Managed?

Our SaaS Security Services offer more than just monitoring—they provide a comprehensive security partner for your organization's SaaS environment. With proactive monitoring, tailored alerting, seamless integration, intuitive interface, automation, detailed forensics, and dedicated support, we empower you to take control of your SaaS security and safeguard your data, users, and reputation.
